STRATEGIC LAYOUT

Since its establishment, the company has forged steadily ahead in the chemical materials industry, driven by innovation and a commitment to excellence.

We developed our first high-performance silicone sealant with independent intellectual property rights, a key milestone that secured our market position.

Responding to diversified and high-end market demand, we have increased R&D investment, introduced advanced production equipment and technology, and built a comprehensive product portfolio covering architectural sealants, industrial adhesives and electronic packaging adhesives. Our products are well recognized domestically and widely sold overseas, advancing our global layout.

Adhering to sustainable development, we focus on green, eco-friendly products and smart manufacturing, realizing full-chain digital management and strengthening core competitiveness. Our products are now exported to dozens of countries and regions, serving thousands of customers worldwide.

Looking ahead, we will uphold "Innovation, Quality and Service", continue to lead industry technological innovation, and contribute to a safer, greener and better world with premium products and services.

REPORT CERTIFICATE

Seimeda is a leading supplier of high-performance silicone sealants and adhesives, operating as a strategic technology partner to the global construction and industrial manufacturing sectors.

Based in Shandong, China, our company combines agile R&D with over a decade of large-scale production expertise to serve distributors across North America, Europe, the Middle East, and Asia.

With dedicated R&D and production facilities engineered for flexibility, our product range is designed specifically for structural integrity in demanding climates. From high-humidity tropical regions to freezing sub-zero environments, every formula is tailored to ensure reliable application and long-term durability. The strength of the Seimeda brand is built on superior formulations and strict compliance with global standards. Our products are the professional's choice for architectural curtain walls, industrial manufacturing, and home renovation—engineered to perform, trusted worldwide.

Seimeda Quality Partner Programme

The Seimeda Quality Partner Programme identifies approved distributors and applicators who meet our rigorous performance standards through comprehensive training and regular audits. Partners gain privileged access to Seimeda's deep technical expertise in structural glazing, weatherproofing, and advanced silicone bonding applications.

For architects, developers, and project owners, specifying a Seimeda Quality Partner ensures your project is executed by professionals trained to deliver maximum durability and structural integrity under demanding conditions.

Available across Europe, Middle East, Asia, and the Americas, the programme reflects Seimeda's commitment to excellence amid growing demands for energy efficiency, climate adaptability, and long-term building performance.

ACETIC SILICONE SEALANT GP

NEUTRAL SILICONE SEALANT NP

SILICONE STRUCTURAL SEALANT

TWO-COMPONENT INSULATING
GLASS ADHESIVE

SMALL CARTRIDGE SILICONE

ACRYLIC SEALANT

CRYSTAL BRICK GLUE

POLYURETHANE SEALANT

MUTI PURPOSE PU FOAM

LIQUID NAILS

General Purpose Acetic Silicone Sealant

Home Decoration, Window, Door, Aquarium

Contains a high-quality silicone formulation, rigorously tested to deliver excellent weatherability and reliable adhesion across a wide range of substrates, ensuring long-lasting sealing performance for general-purpose applications*.

VERSATILE
ADHESION

WEATHER RESISTANT

NEUTRAL CURING

EASY APPLICATION

DURABLE SEAL

General Purpose Acetic Silicone Sealant

Home Decoration, Window, Door, Aquarium

Seimeda GP Acetic cure Silicone Sealant is a one-part, fast curing, adhesive sealant that is suitable for general sealing and bonding applications. This product will adhere to clean metal, glass, many types of wood, silicone resins, vulcanized silicone rubber, ceramics, and plastic surfaces. The product also cures at room temperature in the presence of atmospheric moisture to form a permanently flexible silicone rubber.

APPLICATION:

1. Sealing around metal, glass, UPVC, most types of woods, building materials and ceramics.
2. Sealing glass, glass windows, shopfront, aluminium joints, showcases
3. Sealing for window door
4. Sealing for aquarium

Seimeda®

Neutral Cure silicone sealant

Home Decoration, Window, Door

Contains a high-quality antimicrobial additive, rigorously tested in accredited microbiological labs to deliver 10 years of proven mould resistance*.

PERMANENTLY FLEXIBLE

SMOOTH TOOLING

PREMIUM GRADE

STARTS WHITE - STAYS WHITE

Neutral Cure Silicone Sealant

Home Decoration, Window, Door

Seimeda NP Neutral Cure Silicone Sealant is a high quality, one-part neutral general-purpose curing sealant that is low odour, and offers unparalleled adhesion and compatibility with a wide variety of substrates and weather durability.

APPLICATION:

1. Ideally suited for general purpose glazing, sealing, and weatherproofing applications.
2. Has excellent adhesion to glass, glazed surfaces, anodized aluminum, concrete, cement, wood, and many plastics.

Seimeda®

Neutral Structural Silicone Sealant

Curtain Wall, high-end window, door

Neutral Structural Silicone Sealant

Curtain Wall, high-end window, door

Seimeda Structural Silicone Sealant is a one-part, low-odour, professional-grade sealant that offers excellent adhesion, weather-resistance, and compatibility with a wide variety of substrates. It can be used to meet a variety of sealing and bonding needs.

APPLICATION:

1. Bonding appliance parts.
2. Other bondable surfaces include UPVC, wood, ceramics, painted surfaces, and most plastics.
3. Sealing and bonding with glass, glazed surfaces, galvanized steel, and anodized aluminium.
4. Sealing electrical equipment.

Contains a high-strength structural silicone formulation, rigorously tested in accredited labs to deliver exceptional load-bearing capacity, reliable movement accommodation and long-term weather resistance, ensuring robust structural bonding for critical building applications*.

Seimeda®

Two-component Silicone

Insulating glass sealing

Contains a high-performance two-component silicone formulation, rigorously tested in accredited labs to deliver exceptional structural strength, reliable movement accommodation, and long-term weather & UV resistance, ensuring durable bonding for large-scale glazing and curtain wall applications*.

LARGE-SCALE APPLICATION SUITABLE

TWO-COMPONENT
SYSTEM

EXCELLENT MOVEMENT
CAPACITY

WEATHER & UV RESISTANT

HIGH STRUCTURAL
STRENGTH

CONTROLLED
CURING SPEED

Two-component Silicone

Insulating glass sealing

Two-component Silicone Structural Glazing Sealant is a two-component high-modulus silicone sealant. As supplied, the base is a smooth, white paste and the curing agent is a black paste. Once catalyzed, the material cures to form a high-modulus, flexible silicone rubber that is suitable for use in structural glazing and curtainwall production. It offers a quick and thorough deep section cure with high bonding strength to most used building materials.

APPLICATION:

Structural or non-structural bonding between metals and glasses of the glass curtain wall. Suitable for structure bonding of full or semi-hidden glass curtain wall. Suitable for structural bonding and sealing of insulating glass.

Seimeda®

Small Tube Silicone Sealant

Home Decoration, Window, Door

Contains a ready-to-use general-purpose silicone sealant formula, easy to apply with standard caulking guns, providing good adhesion, weather resistance and mould resistance for daily household sealing and small repair jobs*.

EASY TO APPLY

READY-TO-USE

GENERAL PURPOSE SEALING

MOULD RESISTANT

WEATHER RESISTANT

HOUSEHOLD REPAIR FRIENDLY

Small Tube Silicone Sealant

It is one-component, fast curing silicone sealant cures fast to form a permanently flexible, waterproof and weather resistant silicone rubber. Easy to use and it is environmentally friendly sealant.

APPLICATION:

Widely used in construction, glass assembling and home decoration. This sealant has good adhesion to most common building materials e.g. glass, ceramic, tile, wood and fiberglass.

Seimeda®

Acrylic Sealant

Home Decoration, Window, Door

Contains a water-based acrylic sealant formulation, low odor, eco-friendly and easy to apply, with good gap-filling ability and excellent paintability, ideal for interior sealing, gap filling and decoration jobs*.

WATER-BASED
FORMULA

LOW ODOR &
ECO-FRIENDLY

PAINTABLE

EASY CLEAN-UP

FAST SKINNING

Acrylic Sealant

Home decoration, Caulking

Seimeda Acrylic Sealant is an economical, environmentally friendly acrylic sealant for general purpose caulking and sealing applications. It is paintable and has good adhesion to most porous surfaces. It is formulated with good body thus able to withstand pressure during the installation. It is suitable for sealing of gaps and joints where slight movement or vibration causes conventional, non-elastic fillers and putties to crack and fall out. It can be applied smoothly and easily and can be cleaned up with water.

APPLICATION:

1. Sealing for doors and windows, stone, ceramic tile, concrete expansion.
2. Bonding and installation of plastic steel frame, ACP paintable, sanitary etc.
3. Joint sealing of decorative stone and concrete expansion joints
4. Suitable for repairs cracks in walls, skirting boards, ceiling boards & decorative ceiling panels

Seimeda®

MS Polymer Sealant

Home Decoration, Window, Door

Contains a high-performance modified silane (MS) polymer sealant, with excellent adhesion, elasticity and weather resistance, free of isocyanate and solvent, suitable for bonding and sealing on most building materials*.

MODIFIED SILANE
(MS) POLYMER

EXCELLENT ADHESION

HIGH FLEXIBILITY &
ELASTICITY

WEATHER & UV
RESISTANT

ISOCYANATE-FREE

SOLVENT-FREE

MS Polymer Sealant

Home Decoration, Window, Door

Seimeda MS Polymer Sealant is a high-performance, one-component, environmentally friendly sealant. It takes the place of most traditional sealants and is designed to resist all on-the-road flexing and vibration. The product is fast curing and provides permanent elastic adhesion to most surfaces with excellent elasticity.

APPLICATION:

1. Bonding applications in industrial, construction, and automotive industries.
2. Connection joints in sheet metal fabrication, sealing of air conditioning systems.
3. Sealing of door joints.
4. Strong and elastic bonding in constructions that are prone to vibrations.
5. Super bonding in car bodies, caravans, and containers.

Seimeda®

Shadowless Crystal Sealant

Crystal, Glass, Acrylic, Accessories

Contains a high-transparency invisible crystal glue formulation, with strong adhesion, fast curing, no residue and non-yellowing, designed for bonding crystal, glass, acrylic, jewelry and other transparent materials, achieving seamless and invisible bonding effect*.

HIGH TRANSPARENCY

INVISIBLE BONDING

FAST CURING

NON-YELLOWING

RESIDUE-FREE

TRANSPARENT MATERIALS SUITABLE

Shadowless Crystal Sealant

Seimeda Shadowless Crystal Adhesive is a new type of MS adhesive system with single component neutral curing, low odor, no bubbles, low VOC, and no corrosion. Widely used in crystal brick bonding, advertising industry bonding, environmentally friendly home decoration, bathroom, glass room, and various industrial applications.

APPLICATION:

1. High transparency, fast surface drying, and fast positioning.
2. Solvent-free, formaldehyde free, and non corrosive, suitable for various substrates.
3. Solidification in water, high strength, and good thixotropy.

Seimeda®

POLYURETHANE SEALANT

Concrete Joints, Perimeter Seals, Automotive Bonding, Roof Sealing

Contains a high-quality polyurethane formulation, rigorously tested to deliver excellent weatherability, reliable adhesion across a wide range of substrates, and long-lasting sealing performance for general-purpose applications*.

PERMANENTLY FLEXIBLE

SMOOTH TOOLING

PREMIUM GRADE

DURABLE ADHESION

DURABLE SEAL

Polyurethane Sealant PU sealant

Car sealing

Seimeda PU sealant is a one-component, fast-curing, moisture-curing polyurethane adhesive sealant, that turns into a flexible, durable and resistant elastomeric seam and has very good adhesion to most industrial materials.

APPLICATION:

1. Adheres without primer to the most common substrates, such as glass, anodized aluminium, lacquered metal, wood, FRP, and concrete.
2. Super bonding and sealing in the automotive industry, especially on surfaces that vibrate – bus-bodies, caravans, and containers.

Seimeda®

MUTI PURPOSE PU FOAM

Window , Door , Pipe Penetrations, Wall Insulation

Contains a high-quality polyurethane formulation, rigorously tested for excellent weatherability, reliable bonding and gap-filling, ensuring long-lasting sealing performance for general-purpose applications*.

HIGH
EXPANSION

FAST CURING

EXCELLENT INSULATION

WIDE SUBSTRATE
ADHESION

MUTI PURPOSE PU FOAM

Polyurethane foam is a ready-to-use, multi-purpose polyurethane foam that expands up to three times its original volume when exposed to air. This expansion capability enables it to fill holes, cracks, and gaps more thoroughly than standard caulks. It has excellent adhesion to most building materials and offers excellent soundproofing, thermal insulation, bonding, and waterproofing properties.

APPLICATION:

1. Foam application for all static joints.
2. Improving the thermal insulation performance of cooling systems.
3. Thermal insulation filling of door and window frames.
4. Sealing flame-retardant joints in walls, ceilings, penetration seals, and joints.
5. Installation, sealing, and leak-proofing of various pipes.
6. Shockproof packaging of various non-standard fragile items.

Seimeda®

Free Nail Adhesive

Woodworking

Free Nail Adhesive

Woodworking

Seimeda Free Nail Adhesive is a high strength, water resistant, professional quality adhesive, specifically formulated to eliminate much of the nailing required for construction purposes, suitable for bonding to a wide variety of materials with excellent adhesion.

APPLICATION:

1. Bonding Wood - wood boards, wooden frames, teak, flooring, wood lines (skirting boards, ceiling lines), composite wood boards, fiber boards, partition boards.
2. Bonding Metals - aluminum alloys, iron, aluminium, stainless steel and other metals.
3. Bonding non-metallic materials - stone, marble, granite, ceramic tiles, plastic, PC, ABS, PVC, cardboard, foam board, etc.
4. Bonding glass, glass mirror, acrylic glass, mirror surface.
5. Home decoration and renovation, etc

Contains a high-strength nail-free adhesive formulation, with instant grab, strong bonding power and excellent adhesion to most building materials, providing a permanent, nail-free fixing solution for interior decoration and installation*.
