

QUALIFICATION HONOR

COMPANY PROFILE

Shandong OYG New Building Materials Co., Ltd was founded in 2014, the factory is specialized in manufacturing and supplying all kinds of building sealing system solutions. With sophisticated professional R & D team, synchronous global production equipment and high-skilled workers, quality of silicones sealant can be guaranteed. The two-component silicone insulating glass sealant, insulating glass structural sealant, single component glass silicone sealant, structural silicone sealant and weather proof sealant.

Compared with other brands on the market, our factory has been collecting and researching silicone sealants that are both affordable and make the quality stable. We are continuous paying more efforts on unremitting research and testing, and finally developed and produced an excellent combination of durability, elasticity and value. We are very happy to find that the products have been well accepted by the market and customers, we have become one of market innovator, and exported to many countries, such as Europe, Asia, Africa, Middle East and North America. We insist on providing excellent quality and affordable costs to revolutionize the industry. We are trying our best to offer a better solution to get quality silicone with lower costs. Looking forward to working with you and start the win-win business for a long time. Join us, to be more competitive.

SEIMEDA

SILICONE SEALANT

01. General Purpose Acetic Silicone Sealant

Seimeda GP Acetic cure Silicone Sealant is a one-part, fast-curing adhesive sealant for general sealing and bonding. It adheres to clean metal, glass, many woods, silicone resins, vulcanized silicone rubber, ceramics, and plastics. It cures at room temperature with atmospheric moisture to form a permanently flexible silicone rubber.

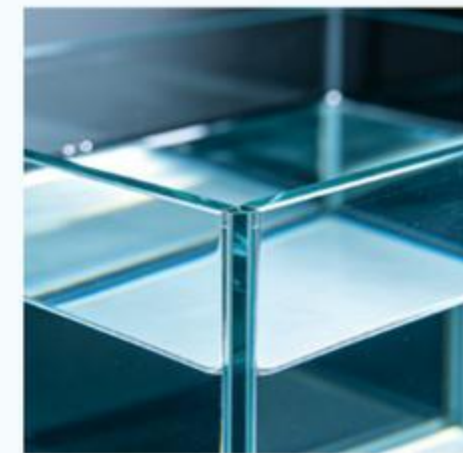

APPLICATION AREAS

Large Glass Curtain Walls

Windows & Doors Installation

Glass Assembly & Aquariums

Indoor & Outdoor Joints

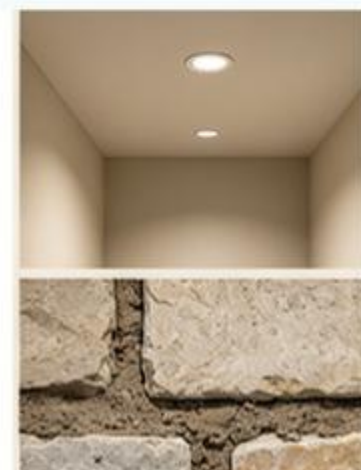

02. Neutral Cure Silicone Sealant

Seimeda NP Neutral Cure Silicone Sealant is a high quality, one-part neutral general-purpose curing sealant that is low odour, and offers unparalleled adhesion and compatibility with a wide variety of substrates and weather durability.

APPLICATION AREAS

Curtain Wall Systems

Interior & Exterior Decoration

PU FOAM

MUTI PURPOSE PU FOAM

Polyurethane foam is a ready-to-use, multi-purpose polyurethane foam that expands up to three times its original volume when exposed to air. This expansion capability enables it to fill holes, cracks, and gaps more thoroughly than standard caulks. It has excellent adhesion to most building materials and offers excellent soundproofing, thermal insulation, bonding, and waterproofing properties.

APPLICATION AREAS

Industrial Applications

Thermal & Acoustic Insulation

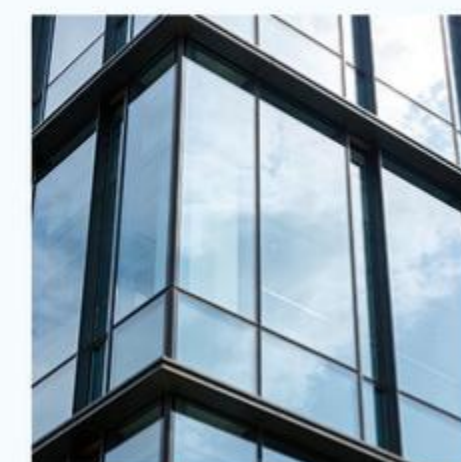

Construction & Installation

03. Neutral Structural Silicone Sealant

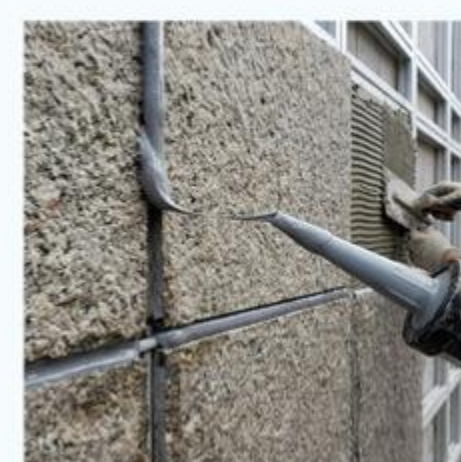

Seimeda Structural Silicone Sealant is a one-part, low-odour, professional-grade sealant that offers excellent adhesion, weather-resistance, and compatibility with a wide variety of substrates. It can be used to meet a variety of sealing and bonding needs.

Curtain Wall Systems

Skylights & Metal Roofing

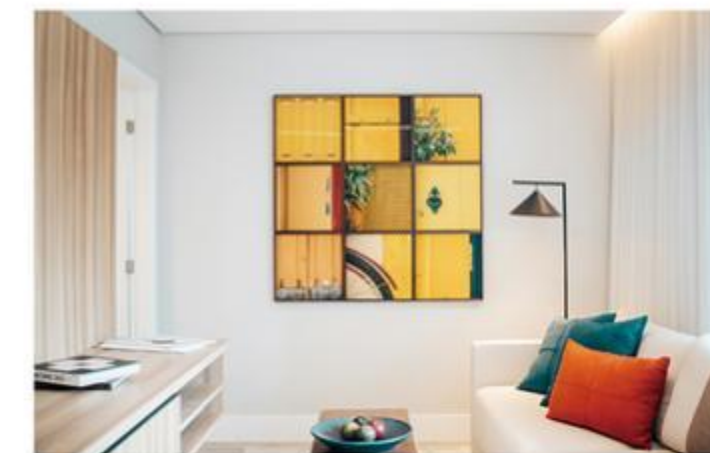

Industrial & Special Projects

FREE NAIL ADHESIVE

Seimeda Free Nail Adhesive is a high strength, water resistant, professional quality adhesive, specifically formulated to eliminate much of the nailing required for construction purposes, suitable for bonding to a wide variety of materials with excellent adhesion.

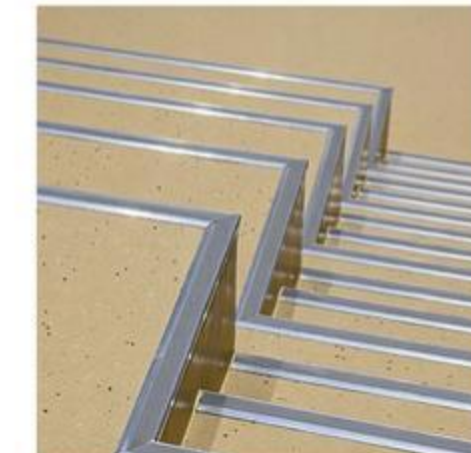

APPLICATION AREAS

Home Decoration

Commercial Display

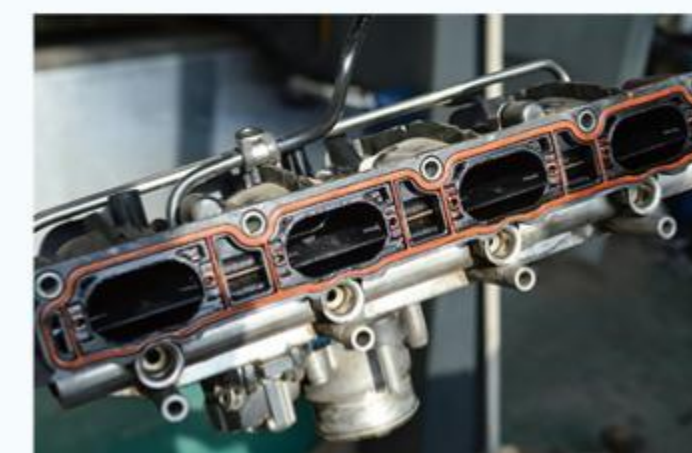

Maintenance & Repair

04. RTV Silicone Sealant

Seimeda RTV makes reliable "formed-in-place" gaskets that resist cracking, shrinking, and migrating caused by thermal cycling. Hence, it is ideal for use as a replacement for gaskets, seals, gasket dressings, cork, felt, paper, rubber, and asbestos gaskets. It is permanently flexible and stable at temperatures from -26°C to +343°C. It is also highly resistant to oil, transmission fluid, water, and antifreeze.

Engine

Valve Covers

OTHER ADHESIVE SOLUTIONS

MS Polymer Sealant

Seimeda MS Polymer Sealant is a high-performance, one-component, environmentally friendly sealant. It takes the place of most traditional sealants and is designed to resist all on-the-road flexing and vibration. The product is fast curing and provides permanent elastic adhesion to most surfaces with excellent elasticity.

Prefabricated Buildings

Curtain Wall Systems

Windows & Doors Installation

Two-component Silicone

Two-component Silicone Structural Glazing Sealant is a two-component high-modulus silicone sealant. As supplied, the base is a smooth, white paste and the curing agent is a black paste. Once catalyzed, the material cures to form a high-modulus, flexible silicone rubber that is suitable for use in structural glazing and curtainwall production. It offers a quick and thorough deep section cure with high bonding strength to most used building materials.

Insulated Glass

Acrylic Sealant

Seimeda Acrylic Sealant is an economical, environmentally friendly acrylic sealant for general caulking and sealing. It is paintable, adheres well to most porous surfaces, and has good body to withstand pressure during installation. Ideal for gaps and joints subject to slight movement or vibration where conventional fillers crack or fall out. Applies smoothly and cleans up with water.

Ceiling & Wall Joints

Interior Material Joints

PU Polyurethane Sealant

Seimeda PU sealant is a one-component, fast-curing, moisture-curing polyurethane adhesive sealant, that turns into a flexible, durable and resistant elastomeric seam and has very good adhesion to most industrial materials.

Automotive Glass

Building & Infrastructure

Silicone Sealant Gun
